Output Stream

```cpp
// Output Stream

#include<iostream>
using namespace std;

int main()
{
    // SINGLE LINE OUTPUT

    // Single stream in single statement
    cout << "Welcome to C++" << endl;

    // Multiple stream in single statement
    cout << "Welcome " << "to " << "C++" << endl;

    // Multiple stream in multiple statement
    cout << "Welcome ";
    cout << "to ";
    cout << "C++";
    cout << endl;

    // MULTI LINE OUTPUT

    // Single stream in single statement
    cout << "Welcome\nto\nC++\n";

    // Multiple stream in single statement
    cout << "Welcome " << endl << "to " << endl << "C++" << endl
        ;

    // Multiple stream in multiple statement
    cout << "Welcome " << endl;
    cout << "to " << endl;
    cout << "C++" << endl;
    cout << endl;

    return 0;
}
```

Output

```
Welcome to C++
Welcome to C++
Welcome to C++
Welcome
to
C++
Welcome
to
C++
Welcome
```

```
11    to
12    C++
```
